

Ecole Polytechnique Fédérale de Lausanne EPFL

Creativity and Design on IoT Devices for Global Competitiveness: China Hardware Innovation Camp (CHIC)

Dr. Marc Laperrouza

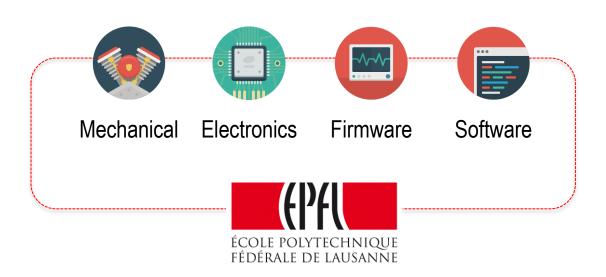

FHKI IoT Seminar - August 24 2017

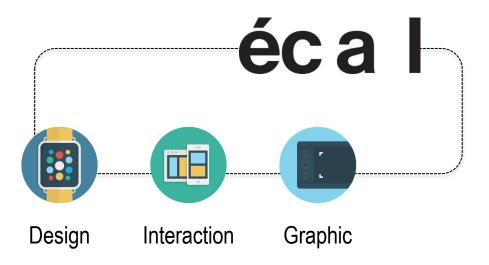

Switzerland

Lausanne's schools and skills eco-system

Business

China Hardware Innovation Camp

DESIGNED IN SWITZERLAND, MANUFACTURED IN CHINA

Concept

Develop a connected device

using open source hardware, open source software and sourcing components from Seeedstudio (+ Adafruit, etc.)

Concept

functional

working

From idea to prototype in 30 days

Underlying pedagogical approaches

Bottom-up

projects proposed by students

Double interdisciplinarity

within EPFL (IC, STI) and around (ecal, HEC)

Real world, real learning

projects with commercial potential

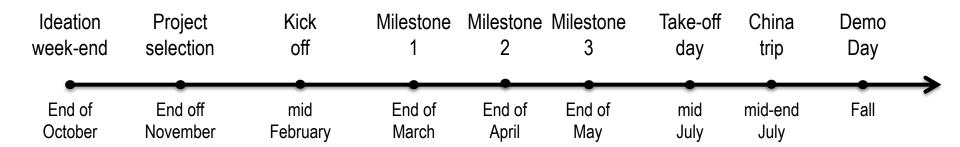

Immersion

in the Hong Kong-Shenzhen ecosystem

Reflexivity

on the flows of goods and knowledge

Timeline

CHIC

8

Example of projet in 2015: FiMi – Smart baby bottle

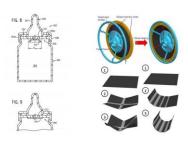

How did they get there....
